This feature allows a user to create a virtualized drawing that can be shared and shown on multiple devices or spreadsheets. Other changes in AutoCAD 2011 include AutoCAD Architecture, which enables architects and designers to design and simulate buildings, AutoCAD Electrical, which is a complete electrical design tool, AutoCAD Civil 3D, which is a complete architectural design tool, and AutoCAD 3D Modeling, which allows users to create and display 3D models. AutoCAD also includes several new features such as the ability to render stereoscopic images of your drawings, the ability to create a virtual 3D model of a project, and the ability to layer and save individual elements of a drawing.
