Cluj-Napoca despotas dublat romana shrek 1 Search and download torrents directly from your browser. Download movies with the best fileneed.Q: Is it possible to determine what database a given user has access to using SQL Server I have a SQL Server that has multiple databases, I want to allow my users to browse the databases they have permission to without having to give them all the databases they might have access to. Is it possible to determine what databases a given user has access to, programatically. A: There is a metadata table named sys.databases in SQL Server. Here is the documentation for the same. DECLARE @dbName SYSNAME SELECT @dbName = db\_name FROM sys.databases WHERE name NOT IN ('master', 'tempdb','model','msdb', 'ReportServer') SELECT \* FROM sys.databases WHERE name = @dbName But you may want to use this instead of the metadata table. select \* from sys.databases where db\_id in (select database\_id from sys.database\_principals where principal\_id=your\_user\_id) Have a look on this for a more readable solution. The Super Bowl of dieting. If you ask me, there are two big contenders for the title of "Super Bowl" of dieting. That's the way I think of the annual Super Bowl football game (football to a large portion of the world, that is), a game with foods that are man-made and full of sugar. That's right. The Super Bowl is a food fest. And at the center of it all is the cheeseburger. A study published this month in the American Journal of Clinical Nutrition, reports that eating a lot of sugar not only gives us a sugar high, it also causes us to eat more. And studies show that, at least, in men, a super bowl of food can lead to a sugar high that lasts way longer than the game itself. The study The researchers at the National Institute of Diabetes and Digestive and Kidney Diseases at the National Institutes of Health led by Dr. Joslin A. Glenn et al. found that, in men, consuming a large amount of sugar "predicts greater declines in sensitivity to bitter stimuli in
