This research proposal is designed to develop technology for the in-vivo intrathecal delivery of recombinant retroviral vectors to the rodent spinal cord. This laboratory has previously demonstrated that genetically modified primary neural cells can be delivered and express exogenous genes in-vitro. The goal of this research is to extend these studies to the in-vivo delivery and expression of the therapeutic gene. In particular, we propose to examine the ability of recombinant retroviral vectors to infect and then transcribe and express the therapeutic gene in the spinal cord. Randy can you pls try to run this on the new floorplan? As of now it has 4 waveforms, 2 bass, and 2 treble. Looks like everything is running perfectly under the previous floorplan. Sent from my iPad using Tapatalk. Sorry to hear that...trying to figure out what happened Cheers With best regards, Randy p.s. that was a boobo. I meant to say that with best regards, Randy Personally, i think this is a better sound then the 07 or 08. Everyone who has reviewed this have said the same thing. It is a well balanced flooring sound, and for the money it is very good. Much better then the toylin in every way. Do not care for the 2 treble knobs. Sorry for the simple typo. Sent from my iPad using Tapatalk p.s. i think i know why this happened. With best regards, Randy Flexible I think you're right! I tried it on a friend's regular floorplan and the sound was different! It was much harder to get this floor to sound like the one in this thread. That floor and this floor don't exactly match. Perhaps the bass and treble were too soft on the regular floor? I'll try it on my own and see what happens. I was tempted to order this for myself. Notice that I didn't mention the price? I don't want to put a number on it, but I want to see what the forum consensus is. Ok, so I set up the floor a few days ago. Sounds like you were right, Randy. I will say it again...for the money, it is a GREAT sounding floor
