What's New In?

Norton Save & Restore is a straightforward and easy-to-use application that provides advanced backup and recovery tools for your personal documents and your computer. The application comes with a user-friendly interface and provides you with great functionality when it needs to restore lost or damaged files, recover your entire computer or simply optimize backup disk space. When it is used for the first time, Norton Save & Restore will automatically determine a valid destination to put your recovered files in. Still, if you have an external drive connected to your computer, such as a USB drive, just make sure it is turned on. After scanning your entire system, the application will recommend the best suited backup strategies. Then, the recovery points will

be created into the specified destination folder so you can rest assured that your computer is protected. Because of its well-organized menus and tabs, you can easily preview the status for each backup process and select the task that you need most. You have the possibility to create a one-time independent recovery point without saving the backup job for future use, recover your computer's state to a specific time and day, as well as to restore specific files or folders that have been damaged, changed or deleted. Quite interesting is that Norton Save & Restore enables you to create a new recovery disk and since it provides you with a wizard-like environment, it can be used by both advanced and novice users. After turning on all storage and network devices that you want to have available in the recovery environment, you can easily create a new recovery disk. Moreover, the aforementioned application enables you to schedule backups so you can automatically capture all the changes as

you work at your computer. In case you experience problems with your computer, you can easily restore a file or an entire drive, as well as to return your computer to a previous state. Using easy-to-understand wizards and reliable features, Norton Save & Restore makes its job well done and helps you to quickly backup important files and recover damaged documents effortlessly.
