SmartCAD is a free 2D CAD drawing app for Windows 10. Drawing is done with the mouse, stylus, and keyboard. SmartCAD is a quick, easy, and efficient drawing app for beginners. SmartCAD is suitable for drafting or creating highly accurate 2D drawings. SmartCAD Screenshot: The idea of creating a CAD app for beginners doesn't always seem to work, but we weren't actually sure if SmartCAD was the right tool for the job. After a quick read-through, we can't deny that we were pleasantly surprised by how easy it was to learn and use, making SmartCAD a brilliant new 2D CAD app. Before we go on and delve deeper, it's worth saying that you're not getting an application that's overly complex. SmartCAD has all the necessary features for creating, editing, and exporting 2D drawings, but it doesn't have a ton of them. Instead, it's all about making the drawing process as simple and convenient as possible. Let's start with how SmartCAD works and how users can create their 2D CAD drawings. You'll first need to create your new project. To do so, you'll need to click the File menu and select New. A popup will appear, letting you know that your project folder is going to be opened in SmartCAD. For the sake of this tutorial, we're going to be working with a template so we can see and explore all the app has to offer. To create a new template, simply navigate to Documents > SmartCAD Templates in Windows 10 and click Add a Template. Once this is done, you can select the new template and name it. SmartCAD's templates are for the most part customizable so you're not going to have to do too much. For the sake of simplicity and the tutorial's purposes, we're going to use the simple template. After this, click OK to continue. This is where SmartCAD starts. If you're only a beginner and are looking to create a simple 2D drawing, then SmartCAD should work just fine. By default, SmartCAD offers a quick, effortless, and straightforward way to create a 2D linear pattern. To do so, simply press the Space bar
