As the name of this software implies, Audio to FLV Converter allows you to convert audio files with the MP3 format to FLV (Flash Video) files. It can be used by both novices and experienced individuals. The interface of the program is clean and pretty intuitive. Audio files can be imported into the queue by using the file browser only, because the "drag and

drop" method is not supported. Batch processing is allowed. In the list you can check out the name, information, duration and output of each clip. So, once you specify the output directory, you can proceed with the encoding job.

Furthermore, you can modify audio settings when it comes to the quality, sample frequency rate, channel mode and volume, preview clips in a small, built-in media player and take snapshots, trim videos by marking the start and end position, remove an item from the list or clear the entire queue, and others. The audio processing program requires a moderate amount of system resources, has a good response time, quickly finishes a task and delivers a good sound quality in

the output audio tracks. We haven't come across any technical difficulties during our tests. Unfortunately, there is no help file available. Otherwise, we strongly recommend Audio to FLV Converter to all users. Audio to FLV Converter
