XVideo Crack For PC

xVideo is a simple to use wrapper around Directshow (for x86 Windows only) that helps its users to create multimedia applications. It supports all.NET languages that support the STDCALL calling convention. The aim of this project is to let users easily produce Directshow filters from the common languages such as C++, Delphi, C#, VB.NET and others.

xVideo works with all the popular Directshow video decoders, namely PVRDSP, XMA, DXVA, H.264, VC-1 and WMV9, among others. It also supports other multimedia codecs including WMA, AAC, Vorbis, FLAC, etc. Features:
Video Encoder: * Supports DXVA and H.264 * Supports all video codecs, also VC-1, WMV9, PS, MPEG, H.264/DXVA (V2.0) * Supports any Directshow pipeline (Preferred Directshow decoders such as PVRDSP, XMA, DXVA) * Supports any language that supports the STDCALL calling convention. * Supports all.NET languages that support the STDCALL calling convention. * Supports any DirectShow sink (M-JPEG, VFW, FFMPEG, etc.) * Supports both FFmpeg and xFFmpeg as a video filtergraph node (xFFmpeg wrapper is a Directshow filter graph wrapper that will help its users create multimedia applications. It's compatible with any language that supports the STDCALL calling convention.) * Supports any audio sink (WASAPI, DSound, NAudio, etc.) * Supports several video or audio stream types (Mpegts, Mpegts2, TS, TS2, etc.) * Supports multiple audio/video filters within a graph * Supports multiple audio/video stream types (Mpegts, Mpegts2, TS, TS2, etc.) * Supports multiple output streams within a graph * Supports either video or audio filters * Supports frames or pixels (video), bytes (audio) and time (audio) * Supports zero copy, pipe, & wait modes * Supports all bitstreams (PS, VPS, MPEG-2, MPEG-4, MP3, AC-3, AAC, Vorbis, FLAC, etc.) * Supports both progressive & interlaced formats * Supports standard, high, and
