BYclouder Data Recovery Pro is a lightweight software application whose purpose is to help you recover lost files from your computer, mobile phones, devices, USB flash drives, CD-ROMs, tablets, laptops, iPhone, iPad, ZIP disks, and other storage devices. Straightforward functionality The tool offers support for a step-by-step approach that offers assistance throughout the entire process. This wizard mode comes in handy especially for rookies, as they can learn to set up the dedicated parameters with minimum effort. Recovery options and performance BYclouder Data Recovery Pro gives you the possibility to select the desired disk, apply filters by file extension for retrieving only the desired files, as well as specify the saving directory where the restored data is stored. During our testing we have noticed that the program carries out the recover process pretty quickly and without errors but this pretty much depends on the number of files that are found on your disk. At the end of the retrieving process, you can view information about the number of recovered items for each file extension, namely TXT, EXE, PNG, EDB, CHM, GZ, MOV, and others. What's more, you can pause or stop the current task and open the saving directory directly from the primary panel. It is important to mention that BYclouder Data Recovery Pro eats up CPU and memory, so the overall performance of the computer may be affected. Bottom line All in all, BYclouder Data Recovery Pro offers a handy suite of tools for helping you recover lost or deleted files. The intuitive layout and filters make it an ideal application for rookies and professionals alike. // // Copyright Oliver Kowalke 2013. // Distributed under the Boost Software License, Version 1.0. // (See accompanying file LICENSE\_1\_0.txt or copy at // // #ifndef BOOST\_FIBERS\_ALGO\_DETAIL\_ALGORITHM\_H #define BOOST\_FIBERS\_ALGO\_DETAIL\_ALGORITHM\_H #include #include #include 09e8f5149f
