“In our earlier FIFA titles, football was primarily about passing and shooting,” said David Rutter, FIFA Lead Producer on EA Sports’ FIFA series. “But the introduction of motion capture in FIFA 17 gave us the opportunity to innovate on the pitch and to better immerse ourselves in real football experiences. That’s what we’ve done with FIFA 22 – we’ve gone back to the original intent of the football game. We’ve brought back the ability to make unique tackles, a return of the classic free-kick technique, and a host of new pass options that you never knew you missed.” Combining player data with brilliant game physics and a new take on artificial intelligence through a new Player Character Engine, FIFA 22 brings realistic features to the FIFA series as never before. The game introduces two new “player driven” camera perspectives, presented as a 360-degree view of the pitch from an “Immersive Camera” angle, and a “Ghost Camera” that showcases every player on the pitch. Both these cameras give you a different perspective on the action, making your favorite team an even more fun place to play and watch. FIFA 22 brings back many of the mechanics that worked so well in previous versions of the game. “We took all the feedback from the fans to develop a game that is as authentic and as connected to the real world as possible, and we’ve incorporated a number of gameplay innovations to make FIFA 22 more engaging and exciting,” said Eri Hoefener, Producer at EA Sports. FIFA 22 introduces two new approaches to tackling: the “Tackle” button allows defenders to make a sudden, reflexive tackle in any direction, like in reality. The new “Handball” feature uses a system that monitors every defender on the pitch to determine whether they’re attempting a handball or just fumbling the ball out of play. FIFA 22 introduces a new “Split Phase” control scheme that allows players and coaches to completely change their defensive tactics at the drop of a hat, with a new “Skipper” button bringing up the formation and line-up directly from the corresponding “Captain” button. In addition, players who thrive in a full-back role can enjoy a massive boost to creativity and passing by making quick switches on the fly.
