It was once said that if you had never read the thoughts of another being, you would have a shallow understanding of human nature. Over the course of a year, you will have the opportunity to delve into the minds of the three major character types. Completing Objectives will prompt you to read the thoughts of your partner in crime or your opponent, in addition to the parents of your new friend. There are nine different side missions that will allow you to effectively influence the story. Each mission has its own set of goals to guide your path. Your journey to learn the truth

will ultimately be guided by the controversial choices you make along your journey. The choice of a human is nothing less than the choice of humanity itself. * To find a complete list of words in the game, please consult the Glossary. *

The following is the story of how I got involved in the Council of Seven. Should you follow my tale, I'll take you on a journey to the land of Erebonia and introduce you to the Holy Land of Britannia, the only refuge for those who stand for freedom and justice. From the stories of witnesses, I have created a narrative that will not only introduce you to Erebonia, but also take you on the path to your own destiny. There are some who call this fate and some who call it a world gone mad. It's true that Erebonia itself is at times shrouded in war. But the war is not the whole truth. In fact, the truth may even lie in Erebonia's darkest depths. In Erebonia, there is a place known as the Keep. The Keep is nothing more than a place of refuge for those who fear violence and who have found refuge in Erebonia. It is a place where the seven gods of Erebonia gather and hold court, where they hold their power over everything under the land. During the war that has engulfed Erebonia, the Keep has remained untouched by war. In the middle of the conflict, however, the Keep has fallen under the curse of Erebonia's greatest hero: Ramza. Ordinarily, even the mere mention of the name Ramza sparks such fits of rage amongst Erebonians that their tempers break. But Ramza

was different. He took the Keeper and kept her prisoner, drove her into a corner. I cannot say precisely what he did to her, nor can I say that she was badly treated. All that I know is that all of Erebonia trembled in fear at the

AeroTheGame was created out of a passion for all things retro. I wanted to create a space shooter with retro and modern tech in a 2D pixel graphics style. The result is a minimalistic game, combining the old school space background with an improved fps. Two development platforms were used, Unity for all the 3D and XNA for the 2D. Unity gives me the opportunity to create a complete package, including XBOX live achievements. AeroTheGame was released in the Electronic Entertainment Expo (E3), PC gaming magazines and indie gaming websites. published:15 Jul 2011 views:138337 Etsy is a great place to go to find wonderful items for yourself, friends or family.
