- Comprehensive PC maintenance, cleaning and optimization - Trusted by over 2 million users - Free and open-

source (GPL) Form Design Studio Pro 2.0 is a fast and easy-to-use form design solution for creating forms in Word, WordPerfect, OpenOffice, and PageMaker. With Form Designer you can select components from the library, preview the form in the preview panel, drag and drop components, use special buttons to resize the form, create multiple form pages, and apply a background image for additional customization. Form Designer also supports

text alignment for the text boxes, border styles, and border colors for the form borders. Components from the library include progress bars, time/date, group boxes, static text boxes, and image buttons. Form Designer provides the flexibility to use many different layout types: Wizard, Gridded, Basic, Full Border, and Full Border Gridded. The Wizard layout type simplifies the process of creating forms, while the Gridded layout style allows for a more professional

presentation of forms. Form Designer supports mixed layouts. With this option you can create a form that has Wizard and Gridded layouts. This option is best for those who want a simple way to create a form without the complexity of the Gridded layout. Form Designer uses Word's Comments property to store form data. This allows you to move form data between different Word documents. Form data can be imported and exported in plain

text. Besides storing form data in Word, Form Designer can also export to: EXCEL, XML, HTML, and PDF. From the Options dialog you can choose to use different fonts for the static text and other form components. You can also specify the text alignment for text boxes and image buttons, and display or hide the form preview pane. Form Designer also provides the ability to export your forms to: Excel 97-2003, Word 97-2003, WordPerfect 5.1, and

PageMaker 5.0. For easy form customization, components can be resized or moved by using the list on the left side of the preview panel. You can also create multiple form pages using the Pages option. If you select a background image for a form, you can show or hide the form preview pane with the Collapse and Expand buttons. For easy form customization, Form Designer also provides a Properties control for all the form components. You can edit the

properties of the text boxes, image buttons, static text boxes, and group boxes.
