===== Budengiin Budengiin (ᠪᠦᠳᠡᠩᠭᠢᠨᠪᠦᠳᠡᠩᠭᠢᠨ) is a Mongolian food that is prepared for the Mongolian New Year in the winter (from the 29th of the month to the 2nd of the next month), when the weather allows it. During the winter, the realists used to make lots of different foods and eat the new year foods when the weather became a little bit warmer. However, there is the not real name of this food. During the summer months the Budengiin is mostly consumed with butter. In

It is a program that allows you to record your desktop, make a video file and send it as a message that can be played back through a pop up window. It can be used both in private and public. You can use it for both of these uses: 1. Making virtual demonstrations. 2. Used to send a message that you are on the system and do not want to be disturbed during the demonstration. 3. Recording lectures, seminars and training sessions with audio and video. 4. This is a cheap anti-idiot solution to prevent someone from making a log of your password. 5. You can use it for demonstrations to help bring a person into the system and the anti-idiot. 6. To help identify a user when you are on the system. It is a cross platform program, written in java. The main function is to use java programming to record your desktop and convert to a video file which can be played back as a pop up window. This is a video demonstration of the program. To open the program, follow the below instructions: 1. Download the.jar file. 2. Install the jar file. 3. If the main program not working: a. Rename the.jar file. b. Delete it. a) T : Right click on the folder "C:\Program Files (x86)\haxe\packages" b) L : Click on "Delete" and then "Yes" On starting the main application hit ctrl + alt + esc, to open the task manager. Once the task manager opens click on "I" . Open the file "Xx.class". With an editor like Notepad, open the file "Xx.class" and look for the last line. This last line should read "KeenBootXx". Change this to "KeenBoot.exe". Press the key and then press the key. Re-open "Xx.class" and save the file. Now restart the machine
