■ The End of a Myth It is a tale spanning thousands of years of history. It is a tale that, in many circles, is spoken of as a tale of legend, yet the real world's great traditions contain it. THE END OF A MYTH ▼ The four [Elden] Princes of the Underworld have been given gifts from the [God of Wisdom] Ygg, and, a century after the great tragedy that occurred on the land, have returned to that land. The story of the divine protection of the [Elden] Ring and the battle between darkness and light has been passed down in lore. [The] [Elden] Princes are not only the protectors of the Rings; they are the defenders of the light in a world that, despite the great tragedy that occurred a century earlier, is standing on the brink of ruin. Taking advantage of their power, they have gained great influence within the land, which is at war with each other. As the darkness begins to swallow the world, the [Elden] Ring confronts the Prince of Death, who still lies waiting for the moment when he can plunge this world into eternal darkness. ■ The Legendary Hero A Heroic Life Hero Valour Hero Corruption A Legendary Life The story of a legendary life who, in his youth, is a nobleman's son and future [god of wisdom]. A Heroic Life Summoning his divine power, he commits himself to a life of service with the blessings of the [God of Wisdom]. He gains the love and admiration of all those around him. He expands his influence throughout the world, and becomes the guardian of the [Elden] Ring, which has been entrusted to him. Hero Corruption The son of a nobleman, the man's child abandons the life of nobility and joins the army. As he fights under the [God of Wisdom], the man gradually gains command over his soul. Soon the corruption of the [God of Wisdom] has been repulsed, but, unable to endure the loss of honour and dignity, he takes refuge in misery. A Legendary Life After many years, the man returns to his home, which has been destroyed by a war; but, afflicted by sadness and suffering, he willingly commits himself to solitude. ▼ A Legendary

### Free Download Elden Ring

**Download the file. Unzip the file. Enter the installation directory. Install the game. Run the game. Play ELDEN RING. Enjoy!Before we begin, if you don't mind, I'd like to say a few words about the history of the space-chess game and what is to come. Most of you have probably played Space Chess over the Internet with your own humanity. That is, one of you keeps a few hundreds of pieces in the screen, by moving them around and exchanging them through switches while the opponent does the same. I hope you remember that, although you can play with any intelligence, you face strong constraints. The most important one is your attention, that is, your ability to understand the game at the same time. If you do not understand the game, you won't see what's going on. So, let's learn how to play. In the first place, you can take any chess opening and play different endings to the enemy pieces. You can prevent them from attacking by moving only your pieces forward to a defense line. The pieces can be placed in the defense line by using the colon command (:), but you will have to be on the defense of two lines at the same time. To do this, you must first make an arrangement to attack with your neighbor pieces. Each piece has a number (in the form of a teletype command, such as :da2), and pieces of the same color that are within touching distance of each other can send messages to each other. If you send a message, it will be received by your mate. If you send a message and your piece is attacked, you and your mate will fall back into the same defense line, but you will be protected from the same thing if you are attacked with a different color. It is important to note that the messages are broken and can be sent again with another number (:gen 5). If you are attacked from two different colors, you cannot block with the help of these messages and will fall back into the same defense line. It is also possible to move a single piece or even your whole army to a defense line. If you do that, you and your enemy will occupy the same line and the enemy pieces will be attacked in two lines. If the enemy attacks, you and your ally will fall back into the same defense line. When you play at home on the computer, you**
