Windows [April-2022]**

- Motive Motion Tech (MMT): Drives all on-ball actions, from dribbles, counter-attacks and interceptions to crosses, free-kicks, headed passes and penalty kicks. MMT is a simulation technology that mimics the real-life movements and actions of players by tracking the motion of each player's full body.

- Onball Maneuvers: Detects the position of the ball and other players on-ball, then uses real-time tracking data to predict ball movement through complex combinations of short- and long-range directional dribbling, ball flight, real-time reactivity, ball access and passing.

- Real-Time Reactivity: Allows players to read real-time positioning and animations of opponents in order to time attacks or defensive passes.

- Analysis Engine: Uses data from the game, online and user-generated content to unlock a

depth of performance in every player and every position. Player ratings are adjusted to match your team's skill level and chemistry. - One-on-One: Includes a redesigned contextual match engine that gives you the ability to set defensive rules specific to your tactical needs - i.e. the match will run more time-sensitive and predictable for you in those situations. - Defending AI: Creates more intelligent and reactive defending that can read and anticipate your team's actions as early as possible - making it easier for you to create high-level attacking moves. - Double Pivot System: Players have many more attacking options including through-balls, one-on-ones, set-pieces and more. They also have more defensive options, including pressing, zonal marking and doubling up on zones. - Big Teams and Small Teams: New, immersive team-management system lets you take direct control of the team from beginning to end. All clubs are represented by three AI levels based on your team's league position. - Team Create:

Based on the Big Teams and Small Teams feature, the new Team Create mode allows you to play as any club in the world, and create your own teams. All clubs from all competitions can be created. - Coaching: Practice your skills by playing a series of official club-themed training matches against a great team of AI-controlled players. - Dynasty game: New fanatical hardcore mode returns. Other features include: - Trusted Soccer: Trusted Soccer is back in FIFA 22 as a new mode

FIFA is an industry-leading community-based game that delivers an authentic football experience across authentic clubs, leagues and stadiums. Powered by Football From FIFA 14, new changes to improve the gameplay experience have allowed for bigger celebrations, more community interaction, more realistic tactical options, more authentic finishing, improved dribbling and more.

Adjusted Physics FIFA's physics systems provide more realistic movement and collisions for players, ball, pitch, etc.

Refinement to controls & gameplay A new series of small gameplay changes have been added to create more fluid, predictable and realistic gameplay, resulting in a smoother experience for players.

Video & Audio The video and audio in FIFA is the most realistic ever seen in the series, providing a true football experience.

All-new ball physics & control Every time you kick or pass the ball, the ball will move more realistically, with changes to the speed and

angle of rotation. The new ball physics also mean players can control the ball better through impact with players and through work of their feet. FIFA Ultimate Team FUT is the deepest and most flexible mode in the series. It features more cards, packs, stadiums and more. Refined tactics The tactical side of the game includes a new User Interface and improved visuals. Refined passing options More options allow players to work together in open play, defend in numbers, score headed goals and more. Improved visuals FIFA's graphics engine has been upgraded to support HD, with more detailed crowd animations, detailed player models, brighter colours and more. New camera angles and clearer replays More camera angles, a user interface that makes the setting easier to navigate, and improved replay graphics have been implemented in FIFA. New Ball Physics FIFA's physics engine has been upgraded to provide more realism and more options for gameplay. The ball now reacts more realistically to the

laws of physics when it bounces, spins and rolls. Players can readjust their shot direction by making tighter or looser turns and move more naturally when dribbling. Tighter dribbling & turning When dribbling, your move will be tighter with more subtle touches, which also includes the ability to grab the ball off the ground to pass. Both opponents and teammates are more aware of what you are trying to do, including the option to
