Over 60 million people have come to know TorqueLance, creators of Maximus vs. Evil, as the company that goes "where no game has gone before." Even more, over half of the downloads of TorqueLance's original "TorqueLance" game launched via Android's Google Play. # TorqueLance has three patented and proprietary user-interface devices, the "TorqueLance daz," "TorqueLance daz interpolator," and the "TorqueLance daz interpolator 2," which have been adopted as a hardware standard for the Android platform. # TorqueLance's new Android title, "Tarnished," is an award-winning fantasy action role-playing game that takes place in the Lands Between, a fantasy world where the Elden Ring has been lost for millennia. The ring was a source of power that united the rulers of the Lands Between, and was a symbol of unity. The war of the Lords, a conflict that was fueled by the weakened Elden Ring that is now being restored, is set to span a wide scale. # You have been summoned to Tarnished, the Elden Ring's new fantasy action RPG. You take on the role of a character who has been born from the ancestral lands of a different Elden Ring, and have been chosen by destiny to become a Lord. There, in an unpredictable land, you are thrust into a war that is about to unfold before your eyes. A war that extends to hundreds of thousands of squared kilometers, that has been built upon the ruins of an ancient world in the Lands Between, and that has been engendered by the Elden Ring you protect. —————————————————————————————– This app is powered by [XDA](*This is the Excerpt for the Official Japanese Translation of the title "Tarnished."*Q: Display data from an unordered list in a div I am using Laravel 5.4 and I have two tables, similar to the following. Q: Running a macro in every worksheet in a workbook I have a Workbook with a macro on it (it is called "macro1") which is a Macro that I have made. It has some sheet names it runs on and it should run every time the workbook is opened. But I can't get it to work. I've tried setting the code to "ThisWorkbook" "Workbook" and "Public" (or Public) and it should be noted that there are no Option Private makro or anything. ThisWorkbook.Close Sub Macro1() Dim i As Integer For i = 1 To Worksheets.Count ActiveWorkbook.Sheets(i).Save ActiveWorkbook.Sheets(i).Cells.Clear ActiveWorkbook.Sheets(i).Cells.Insert ActiveWorkbook.Sheets(i).Cells.Borders.Color = vbBlack ActiveWorkbook.Sheets(i).Cells.Interior.Color = vbBlack ActiveWorkbook.Sheets(i).Range("A1:I1").Merge If i
