
AutoCAD Crack [March-2022]

1. Does AutoCAD have a GUI?

AutoCAD has a GUI - user interface. What this means is that if you want to draw on the

screen, you can simply right click and pull up the "Edit" context menu, where you can select the "Tool Palette", select "Drawing Tools" and then select the "Line"

tool. The GUI is quite simple and there are very few options available. However, if you want to customize the tool palette, you can go into the "Settings" option, which is

located at the bottom of the "Tools" dialog. The "Settings" dialog gives you a choice of more than two dozen tool palettes which can be added to the

"Tools" context menu. The tool palettes are very easy to use. There is an "About" option, which shows you all of the current tools available for drawing, etc.

There is also a "Help" option which will give you very detailed instructions about using AutoCAD. The two tool palettes that are most useful for drawing include

the "Dynamics"
tool palette, which
has only five basic
drawing tools.

And the

"Architectural"
tool palette, which
has 23 basic
drawing tools. So
if you can get into

the habit of using one of these two tool palettes, you will never have to use the basic "Draw" tool, which is not too difficult to use but which has very limited functionality. 2.

How do you import a drawing? Before you can actually create a drawing, you have to import a drawing from another source. This is done by using the "Import"

option of the "File" menu. Select the file you want to import (such as a DWG, DXF, etc) and then choose the "Import" option from the "File" menu. If you have

previously
imported this file
in AutoCAD, it will
open
automatically. If it
is a new file, the
import dialog will
appear with a list
of available
formats and you

can choose the format you wish to import (e.g. DWG, DXF, etc).

3. How do you save a drawing? Saving a drawing is a very easy process. Select the "File" menu,

select the "Save" option and then select the type of drawing that you want to save (e.g. DWG, DXF, etc). This will open a dialog where
