eedownload.html q: the difference between  
the fractionalized spin of an electron and a  
half what is the difference between the  
fractional spin of an electron and a half? i am  
learning quantum mechanics and the  
explanation i was given is that  $-1.5 \cdot \frac{1}{2} = \frac{3}{2}$  -  
this is the difference between the  
fractionalized spin and a half? also  $\frac{1}{2} = \frac{3}{8}$   
 $+ \frac{2}{8} + \frac{3}{8} + \frac{4}{8}$  and the same way  $\frac{1}{2} = \frac{3}{8} + \frac{4}{8}$   
etc.. but why don't we say  $\frac{3}{8}$  instead of  $\frac{4}{8}$ ?  
a: the statements you have written are not  
true in general.  $\frac{1}{2} = \frac{3}{8} +$   
 $\frac{2}{8} + \frac{3}{8} + \frac{4}{8}$   $\frac{1}{2} = \frac{3}{8} + \frac{4}{8}$   
the first
```

statement is true only if you interpret fractionalization of spin as a spin of a system which has half of the spin of the whole system. for example the spin of two spin- $\frac{1}{2}$ particles would be equal to $\frac{1}{2}$. the

second statement is true if you interpret fractionalization of spin as a sum of fractions which are equal to $\frac{1}{2}$. according to the pauli exclusion principle, each and every qubit with spin $\frac{1}{2}$ must be treated as different. in this picture there is no problem with having 3 $\frac{1}{2}$ -particles and then there are 2 $\frac{1}{2}$ -particles in this system. , reparticiones y contrataciones

administrativas que tienen que ver con la creación de empresas y el consenso social no pueden ser delegadas a los representantes de la empresa. la fórmula que se está esperando es una fórmula que incluya todas las fuerzas políticas, que integre a todos los partidos políticos, y que no sea una fórmula exclusivamente de las grandes empresas».
