So we went from these five-digit numbers, like 1,000. To three-digit numbers, like 100, to 2 digit numbers, like 10, to 1 digit numbers, like 1. So we went up to 10. And the whole time we're just going up, and we're just going up. All the way to 10. And then we go to the one and 2 digits. And then all the way down to the three-digit numbers. That's how we got from five digits, to 1 digit, to 2 digits, to 1 digit. So we got it. But we didn't learn anything new, right? We got it, but we didn't learn anything new about the number. We just went up. So the next time we were doing it, we're going to be focusing a little bit more on what we're learning and what we're gaining, not just that we're getting to the 10, but we're getting to the 1, the 2, and the 3. And so when we're doing the three-digit to the 10, it's just going to be easier. We're going to see the 10 and then we're going to think, oh, I got to get to the 10. So we're just going to do a little bit better on the 10, and that's going to help us for the 1, the 2, and the 3 because they're going to be easier. So we're going to be focusing more on getting the 10. The rest is going to
