#### What's New in the Solway 039;s Task Scheduler?

Solway's Task Scheduler is a utility developed by solway Soft Ltd. It is mainly focused on executing applications or opening files at a specified time. The interface of the program is fully graphical and it includes two main windows which can be used to view the added tasks, the controls and the details about them. If you need to add a new schedule, Solway's Task Scheduler will prompt you to enter a name for it, choose a file or a program to be executed and set start and end times, end date and the repetition frequency. On the other hand, the scheduler allows you to change some settings, such as the weekdays in which the task should be executed or the holidays which should be skipped. In addition to that, you can force Solway's Task Scheduler to verify the settings before executing a task, set up a log file for the program or even force it to be executed on system startup. Actions can also be launched from the tray, which can be enabled by selecting "Always on Top" in the Settings tab. You can also print reports to the printer, save them as HTML files or even save them to a specified folder on the hard disk. The Help content is fairly limited, though. Verdict: Solway's Task Scheduler is a utility developed by solway Soft Ltd. and it is mainly focused on executing applications or opening files at a specified time. It is a simple and straightforward program and it does not require any special training to use it. However, the lack of help makes it almost impossible for some people to operate it effectively. It includes an interface which is not too complicated and it is provided with a few features which can be appreciated, though they are not the most interesting ones. In addition, it can be accessed from the tray and can be set to launch on system startup. It can be used to run programs or open files at specific times. However, it is of little use to me, as I only need to use it once in a while. The developers should give more attention to the Help content.
