VideoPower BLUE is an all-in-one solution that can not only convert your videos to other formats, but also edit them, create collages and capture your screen. Straightforward video converter The main window of the utility is user-friendly, and you can easily select the videos you want to convert to other formats. No matter if you added the files via drag and drop or by manually browsing to them, you can re-arrange them within the list, or merge all of them in a single large file. You can add background audio or attach subtitles, then proceed to the final step, that of choosing the output format. The supported extensions are grouped in relevant categories, video, audio or devices, so you can easily find the one you are interested in. You can even limit the size of the output file when using VideoPower BLUE. Built-in video editor Alternatively, if you only want to enhance the looks of your clip, you can use the integrated editor. You can trim specific fragments by setting the start and end points. You can also crop and rotate the video frames, while also adjusting the volume, speed, contrast, brightness and saturation. Text and image watermarks can be overlaid, while the subtitles can get modified transparency levels and styles. Moreover, you can make collages that feature both pictures and videos, with the layout, border and aspect ratio you prefer. Customizable screen recorder Another handy function of VideoPower BLUE is its screen recorder. You can capture a certain region, the full screen, the web camera, the audio streams or specific areas around the mouse. The generated video's format can be converted to one of your choosing using the embedded converter. Conclusion All in all, VideoPower BLUE can help you perform a wide range of actions involving your videos, even if you are not a tech-savvy user.
