I have tried using the {h1} and {h2} tags in the channel entries tag and have even tried using str replace() but neither seem to work. Any pointers on how to do this would be much appreciated. A: If all you want to do is add a header to your page, you can simply add the following code to the channel entries tag: {if segment 1 == main page'} {h1}This is the main page{/h1} {/if} If you want to add more than one header element, you'll need to use tag pairs and the syntax changes slightly depending on whether you want single or double headers. If you want to have a single header, then you need to do something like this: {if segment 1 =='main page'} {h1}This is the main page{h2}{/h1}{/h2} {/if} If you want to have a double header on your main page, then you need to do something like this: {if segment 1 == main page'}  $\{h1\}$ This is the main page $\{h2\}$  $\{/h1\}$  $\{/h2\}$  $\{h3\}$ This is the second header $\{/h3\}$  $\{/if\}$ [Oral contraceptives for contraception and in vitro fertilization].
